Managing Library: Add & Create File

The screenshot displays a library management interface. At the top, there is a navigation bar with 'Library' and 'Notebook' tabs, and a user profile for 'Umi Kalsom Mohd Hussain'. The main area is divided into a left sidebar, a central list of references, and a right-hand details panel.

The left sidebar contains a '+ Add new' button, which is highlighted with a red box. A dropdown menu is open from this button, showing options: 'File(s) from computer', 'Add entry manually', 'Import library >', 'My Publications', and 'Trash'. A sub-menu is also open from 'File(s) from computer', listing file formats: 'BibTeX (*.bib)', 'Endnote XML (*.xml)', and 'RIS (*.ris)'. The 'BibTeX (*.bib)' option is also highlighted with a red box.

The central panel shows a table of references under the heading 'All References'. The table has columns for 'AUTHORS', 'YEAR', and 'TITLE'. The first row is highlighted in blue.

Mendeley Desktop: Library Structure

The screenshot displays the Mendeley Desktop application window. The interface is divided into several sections:

- Top Bar:** Contains the menu (File, Edit, View, Tools, Help), a search bar, and the user's name (Umi Kalsom).
- Left Panel (My Library):** Shows a hierarchical view of the library structure, including "All Documents", "Recently Added", "Recently Read", "Favorites", "Needs Review", "My Publications", "Unsorted", and "Copyright Law". Below this is an "External Library" section with a "Filter by Authors" dropdown menu.
- Main Panel (All Documents):** Displays a table of documents with columns for "Authors" and "Title".
- Right Panel (Details):** Shows the details of the selected document, including the title, authors, journal information, and an abstract.

Abstract:
Recent technological advances in digitization and online communications have enabled unauthorized reproduction and illegal file-sharing. However, controversies still exist over the impacts of digital content piracy and copyright protection policies. Using a game-theoretic framework, we examine the impacts of digital content piracy and copyright protection policies on product quality, firm profitability, consumer surplus, and social welfare when consumers exhibit loss aversion in the quality dimension.

Academic Journal

By: Delis, Manthos D.; Kazakis, Pantelis; Zopounidis, Constantin. *European Journal of Operational Research*, 2022, 300(1), pp. 1-13p. Abstract: • We examine the role of **management** in merger and acquisition (M&A) decision production model and Bayesian techniques. • We show the higher scores in **management** increase the nonlinear U-shaped relationship between **management** and M&A events. Firms with good **management leadership**, and technical and conceptual skills to enhance firm value. In this paper, we examine the effect of **management** on takeover events. M&A decisions are among the most important corporate decisions, on which firms estimate **management** as a latent variable using a structural equation production model and Bayesian techniques. The key advantage of the Bayesian approach is the use of informative priors from survey-based **management** estimation methods, which are however available for a limited number of firms. Subsequently, we examine the effect of **management** on takeover events. We first show that **management**, on average, increases the probability of M&A deals. However, we also uncover a nonlinear U-shaped effect, which is consistent with the theoretical premise that poor **management** leads to many value-decreasing M&A deals, whereas good **management** leads to many value-increasing M&A deals. New Horizons

The New Horizons mission received approval in November 2001⁶. Its objective was to send a spacecraft to Pluto - the only unexplored planet (still recognized as a planet at that time) in the solar system. Previous missions intended to reach Pluto - including *Pluto Fast Flyby* and *Pluto Kuiper Express* - had been cancelled, but after a thorough new profile selection process, NASA committed to launching *New Horizons* as part of its New Frontiers program.

Due to the distances involved - New Horizons would have to cover nearly three billion miles to reach its objective - the craft was designed to have as little mass as possible, but would be launched using the huge Atlas V expendable launch system. This guaranteed the greatest possible velocity for the craft.

When the mission launched on 19 January 2006, the probe left Earth on a solar system escape trajectory travelling at nearly 37,000 mph. It crossed the Moon's orbit just eight hours and thirty-five minutes after lift-off, and reached that of Mars only 78 days later. The probe gained a gravity boost from the gas giant Jupiter to accelerate past 51,000 mph, but would still have over eight years to travel to its objective. New Horizons is expected to make its closest approach of Pluto and its moons on July 14, 2015⁶

Abstract:
NASA's New Horizons mission, part of the New Frontiers Program, is expected to reach its primary target - the dwarf planet Pluto - on July 14 2015. Mendeley was invited to visit NASA during the close approach of Pluto and will be at NASA HQ on the day of the encounter. This report was written to mark the occasion and to share our excitement at being present for the event.

Is EU copyright law a danger to online freedom of expression?

Authors: P. Jouglex

Proc. Title: *Communications in Computer and Information Science*

Year: 2017

Volume: 792

Pages:

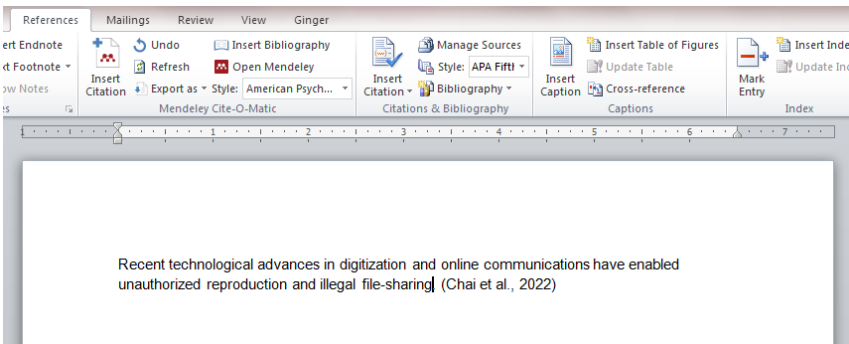

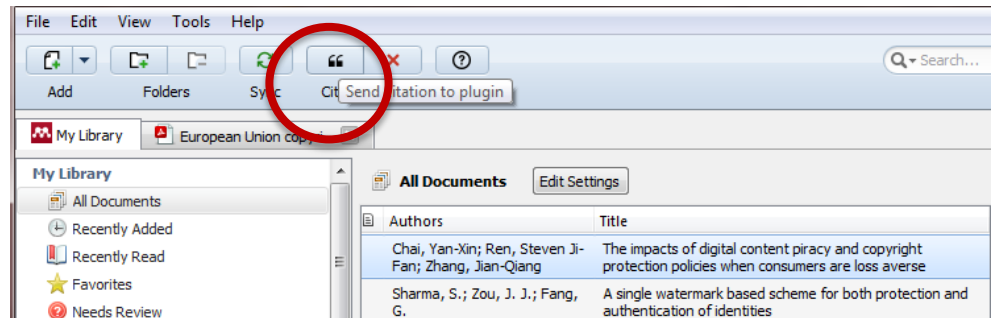

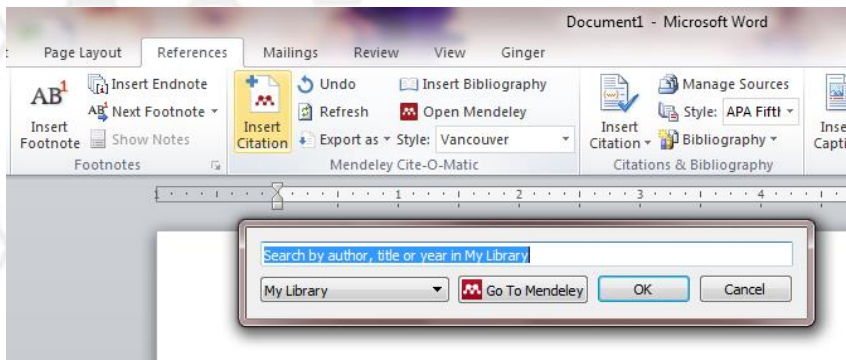

Abstract:

The present paper discusses recent evolutions in jurisprudence on online copyright law enforcement in Europe, emphasizing consequences for freedom of expression. It debates whether free speech is menaced by application of this case law. First, reference is made to the relevant case law at the European level. Secondly, the author refers to injunctions against intermediaries and concludes that the danger to freedom of expression has been identified and taken in account by the court. Finally, the author refers to the parallel jurisprudential evolution of copyright law related to hyperlinks and demonstrates that here the issue of freedom of expression has not been taken enough into consideration, something that may have disastrous consequences.

Increasingly, national courts have begun to consider the impact of the Charter of Fundamental Rights on EU copyright law. (Griffiths, 2019)

According to Fromer & Silbey (2021), the provisions at issue in the draft Restatement of Copyright Law on which ALI membership will vote at ALI's upcoming annual meeting are central to copyright doctrine and have been the subject of numerous court decisions over the past several decades of technological and industry change: originality, fixation, categories of copyrightable subject matter, the idea-expression distinction, and authorship and ownership.
